

## 2018 TTX VAULT CATALOG

*WHAT IS YOUR TIME WORTH*

**TTX VAULT**  
A BLUE CELL PRODUCT LINE

## WHAT IT IS

TTX Vault is a first of its kind location to purchase both individual and packaged exercises. With our tabletop exercise you receive a base scenario, in a format that allows you to make it fit your location. An additional complete template set is provided in our Chelsea County USA online simulation environment. This password protected website has endless scenario play possibilities. All of the Homeland Security Exercise and Evaluation Program suggested paperwork for a tabletop exercise is pre-assembled and pre filled out. This includes the Situation Manual, Briefing in PowerPoint, Participant Feedback Forms, Exercise Evaluation Guides and After Action-Improvement Plan Template. This concept and products was designed keeping in mind how valuable emergency managers and public safety professionals time is. Developed from The Blue Cell, LLC and Command School TTX archives, TTX Vault provides a jump start on the tedious process of tabletop assembly.

## WHO WE ARE

The Blue Cell, LLC is a by design planning company with a primary focus on education and training for government at all levels, non-governmental agencies and private sector entities engaged in incident and emergency management activities. Secondary initiatives at the company include exercise design and facilitation and planning services. The Blue Cell personnel are also available to support planning related operations on real world events. The Blue Cell, LLC has over 2000 customers from its varied interests across North America.

## HOW IT WORKS

Conceptually, having a library of pre assembled exercise is an ideal situation for many, but only if you can unleash its true potential.

Pre canned does not mean your work is complete. It is only partially completed. Like much of the food we buy in the grocery store, you

will need the some skills and knowledge of how the ingredients work together, a stove an oven a refrigerator and a place to put on the meal.

Lastly, you do need the skills to present that meal have people enjoy and get something out of it. Either on a disk, thumbdrive or by direct

download we deliver as complete set of sample scenarios.

Use our webportal / credit card online processing system or email us at [ttxvault@thebluecell.com](mailto:ttxvault@thebluecell.com) to make arrangements for purchase order, check purchase, direct invoicing or monthly billing.

### Investigation - TTXP55 \$100

Find patient zero. Protect the patients' privacy. Protect and Inform the Public. All keys to success. Our Investigation-Public Health Setting scenario is designed to assist in the evaluation of plans, policies and procedures and to get multiple departments internally and agencies / stakeholders to work together.

## TTX Vault Package Seven – National Planning Scenarios

In July 2004-The Homeland Security Council (HSC) – in partnership with the Department of Homeland Security (DHS), the federal interagency, and state and local homeland security agencies – developed and published fifteen all-hazards planning scenarios for use in national, federal, state, and local homeland security preparedness activities.

SKU: NPS76

\$0

TTX Package Seven – National Planning Scenarios includes our single scenarios;

- Biological Attack
- Chemical Attack
- Natural Disaster (Earthquake)
- Explosives (IED)
- Radiological Dispersion

### Each Exercise Includes

- Exercise Plan
- Controller/Evaluator Handbook
- Master Scenario Event List (MESL)
- ICS 213 forms of the MESL for Exercise Facilitation
- Exercise Summary
- Participant Feedback Forms
- Exercise Evaluation Guides
- After Action Improvement Plan Template

In 2011, after the approval of The Blue Cell, LLC's Advanced Planning Concepts: Developing Incident Action Plans course for acceptance in the DHS State and Local Catalog a number of the 15 National Planning Scenarios were created in support of the day two functional exercise in the course.

All Functional NPS based scenarios within the TTX Vault Product line come with an additional template set in our Chelsea County USA online simulation environment, including Chelsea County social media platform access. All of the HSEEP required paperwork for a tabletop exercise is pre-assembled and able to be edited.

### Biological Attack – NPS4 \$200

Members of the Universal Adversary (UA) release pneumonic plague into three main areas of the jurisdiction in the public bathrooms.

### Chemical Attack – NPS8 \$200

The Universal Adversary (UA) infiltrates an industrial facility and stores a large quantity of chlorine gas (liquefied under pressure). Using a low-order explosive, UA ruptures a storage tank man-way, releasing a large quantity of chlorine gas downwind of the site. Secondary devices are set to impact first responders.

### Natural Disaster (Earthquake) – NPS9 \$200

In this scenario, a 7.2-magnitude earthquake occurs along a fault zone. Shaking extends throughout the area, greatly impacting the region. Subsurface faulting occurs along 45 miles of the fault zone, extending along a large portion of the local jurisdictions, creating a large swath of destruction. Soil liquefaction occurs.

### Explosives (IED) – NPS12 \$200

Agents of the Universal Adversary (UA) use improvised explosive devices (IEDs) to detonate bombs inside a sports arena and create a large vehicle bomb (LVB). They also use suicide bombers in an underground public transportation concourse and detonate another bomb in a parking facility near the entertainment complex. An additional series of devices is detonated in the lobby of the nearest hospital emergency room (ER).

### Radiological Dispersion – NPS11 \$200

The Universal Adversary (UA) purchases stolen CsCl to make an RDD or “dirty bomb.” The explosive and the shielded 137 Cs sources are smuggled into the country. Devices are detonated in three separate, but regionally close and physically similar, moderate-to-large cities. The results in each city are essentially the same. The contaminated region covers multiple blocks in each city and includes the business district, residential, shopping areas, and a school. Buildings in the affected areas are principally made of concrete and brick; some are stone faced.

# TTX Vault Package Eight – 449 Instructors

## Description Coming Soon!

SKU: 4496

## TTX Vault Package Nine -Z – Drill Package – Utilizing Salamander

You have the equipment. You have the need to practice with it, and there is nothing like a good drill. Secure your exercise needs for years to come. All Utilizing Salamander Technologies Drill scenarios come with an additional template set in our Chelsea County USA online simulation environment and a complete and **robust battlebook**. It also counts as an exercise since all of the HSEEP required paperwork for a drill / exercise provided are pre-assembled and able to be edited.

**SKU: SALD6 \$750**

Z Drill Package Nine contains the following scenarios;

- Fire
- Dignitary Visit
- Tour Bus Crash
- Severe Weather - Recovery
- Hazmat Spill

The scenario disk has over 700 electronic files to support your

tabletop including custom forms and the all plans, informational sheets and maps for Chelsea County USA.

This concept and product was designed keeping in mind how valuable emergency managers and public safety professionals time is.

TTX Vault scenarios give you a jump start on the tedious process of exercise assembly. Additional files provided include ICS forms and custom built document products.

### Each Exercise Includes

- Exercise Plan
- Master Scenario Event List
- ICS 213 forms of the MESL for Exercise Facilitation
- Exercise Summary
- Participant Feedback Forms
- Exercise Evaluation Guides
- After Action Improvement Plan Template

ICS

### Fire - SALD1 \$150

Our Fire scenario is a great practice session involving not only accountability, but also understanding typing standards and how to manage them.

### Dignitary Visit – SALD2 \$150

Our Dignitary Visit scenario is a great practice session that can happen to any size community at any time, and accountability is paramount.

### Tour Bus Crash – SALD3 \$150

In our Tour Bus crash scenario the additional accountability aspects of patient tracking can be explored in addition to the traditional elements of emergency response accountability.

### Severe Weather – Recovery – SALD4 \$150

Our Severe Weather scenario is a great practice session involving public works equipment and accountability, but also understanding typing standards and how to manage them.

### Hazmat Spill – SALD5 \$150

Our Hazmat Spill scenario is a great practice session involving not only accountability, but also stresses the safety aspects of incident management.

## TTX Vault Package Ten - Z – Drill Package One

There is nothing like a good drill. With the seven levels of HSEEP and the clamor for attention generally associated with functional and full scale exercises, somehow the art of a simple drill has been lost. In this product set a jurisdiction can now exercise one of the following single and specific topics in a one day format. All Drill scenarios comes with an additional template set in our Chelsea County USA online simulation environment. All of the HSEEP required paperwork for a tabletop exercise is pre-assembled and able to be edited.

**SKU: DRILLP16      \$750**

Z Drill Package One contains our single scenarios;

- IMT Deployment
- EOC Activation
- Public Information Systems
- Communications
- Manual Accountability

The scenario disk has over 700 electronic files to support your tabletop including custom forms and the all plans, informational sheets and maps for Chelsea County USA.

This concept and product was designed keeping in mind how valuable emergency managers and public safety professionals time is. TTX Vault scenarios give you a jump start on the tedious process of exercise assembly. Additional files provided include ICS forms and custom built ICS document products.

### Each Exercise Includes

- Exercise Plan
- Master Scenario Event List
- ICS 213 forms of the MESL for Exercise Facilitation
- Exercise Summary
- Participant Feedback Forms
- Exercise Evaluation Guides
- After Action Improvement Plan Template

### IMT Deployment – DRILLP11 \$150

Our IMT Deployment Drill focuses on the essential elements of getting the team contacted, briefed, out the door and safely on scene.

### EOC Activation– DRILLP12 \$150

Our EOC Activation Drill focuses on the essential elements of getting the team contacted, briefed, to the EOC, plugged in, turned on, logged in and ready to support the incident.

### Public Information Systems– DRILLP13 \$150

Our Public Information System Drill focuses on the essential elements of being a day to day PIO, working with other PIO's and facing the collective challenge of Social Media today, while carrying out the traditional role of responsibly informing the public. This drill set has a "ripped from the headlines feel."

### Communications– DRILLP14 \$150

Our Communications Drill engages the facets of Interoperability and Redundancy, the key elements of communication.

### Manual Accountability– DRILLP15 \$150

"Did somebody say T-Cards? " Our Manual Accountability Drill walks the participant through the process of understanding an ICS 201, ICS 211 and drilling on creating a system of manual accountability.

## Y - TTX Vault Package Twelve – University Setting

TTX Vault Package Twelve is designed to save you more time than you could possibly calculate. Tabletops assist in the evaluation of plans and to get single and multiple agencies to work together. They are also designed to be scalable whether being used at a local Community College or a University with 50 thousand students. All of the HSEEP required paperwork for a tabletop exercise is pre-assembled and able to be edited.

**SKU: UNITTX6**

**\$500**

TTX Package Twelve – University Setting has our single scenarios;

- Active Shooter
- Dorm Fire
- Gym Collapse
- Severe Weather
- Foodborne Illness

### Each Exercise Includes

- Situation Manual
- Briefing slides in PowerPoint
- Exercise Summary
- Participant Feedback Forms
- Exercise Evaluation Guides
- After Action Improvement Plan Template

The scenario disk has over 700 electronic files to support your tabletop including custom forms and the all plans, informational sheets and maps for Chelsea County USA.

This concept and product was designed keeping in mind how valuable emergency managers and public safety professionals time is. TTX Vault scenarios give you a jump start on the tedious process of exercise assembly. Additional files provided include ICS forms and custom built ICS document products.

### **Active Shooter - UNITTX1 \$100**

It is the unthinkable, however in light of recent events, we do need to prepare. Our Active Shooter scenario is designed to assist in the evaluation of plans and to get multiple agencies to work together. In a University Setting this is particularly complex.

### **Dorm Fire – UNITTX2 \$100**

A traditional structure fire in a dormitory presents a number of challenges that can be discussed in a tabletop format. One being what we take for granted in this type of response. This scenario is designed to assist in the evaluation of plans and to get multiple agencies to work together.

### **Gym Collapse – UNITTX3 \$100**

Its the big game. The entire campus is buzzing and media is everywhere. At full capacity suddenly the roof caves in. Our Gym Collapse scenario is designed to assist in the evaluation of plans and to get multiple agencies to work together.

### **Severe Weather – UNITTX4 \$100**

Severe Weather Event. It sounds simple. We do it all the time. And the student body is made up of adults. This scenario is designed to assist in the evaluation of plans and to get multiple agencies to work together and practice the decision making process in a predicted and slow moving event.

### **Foodborne Illness – UNITTX5 \$100**

The cafeteria does a great job. Thousands of meals without incident. Then suddenly reports come indicating a potential food borne illness. This scenario touches on public health challenges, information challenges with a hint of who done it. It is designed to assist in the evaluation of plans and to get multiple agencies to work together.

## Y - TTX Vault Package Sixteen – Churches and Places of Worship

TTX Vault Package Sixteen is designed to save you more time than you could possibly calculate. Tabletops assist in the evaluation of plans and to get single and multiple agencies to work together. They are also designed to be scalable whether being used at a local Community College or a University with 50 thousand students. All of the HSEEP required paperwork for a tabletop exercise is pre-assembled and able to be edited.

**SKU: CPWTTX6**

**\$500**

TTX Package Sixteen – Churches and Places of Worship has our single scenarios;

- Active Shooter
- Explosion
- Flood Recovery
- Utility Failure
- Shelter Operations

The scenario disk has over 700 electronic files to support your tabletop including custom forms and the all plans, informational sheets and maps for Chelsea County USA.

This concept and product was designed keeping in mind how valuable emergency managers and public safety professionals time is. TTX Vault scenarios give you a jump start on the tedious process of exercise assembly. Additional files provided include ICS forms and custom built ICS document products.

### Each Exercise Includes

- Situation Manual
- Briefing slides in PowerPoint
- Exercise Summary
- Participant Feedback Forms
- Exercise Evaluation Guides
- After Action Improvement Plan Template

### Active Shooter – CPWTTX1 \$100

Unfortunately this is one of the hottest topics in exercise today. Our active shooter scenario is designed to assist in the evaluation of plans and to get multiple agencies to work together.

### Explosion – CPWTTX2 \$100

This scenario is on the list simply because it has happened. The scenario explores both with to do with the threat of explosion and how to respond in the event of an explosion.

### Flood Recovery – CPWTTX3 \$100

Flood recovery has many aspects. In this scenario prioritizing and decision making is emphasized.

### Utility Failure – CPWTTX4 \$100

The Utility Failure scenario in a Church or House of Worship is set at the worst possible time and presents fundamental and advanced challenges.

### Shelter Operations – CPWTTX5 \$100

In this scenario the practice and discussion points center around your location having at act as an emergency shelter. Our Shelter Operation scenario is designed to assist in the evaluation of plans and to get facilities working internally to serve the community in a time of need.

# Y - TTX Vault Package Seventeen – Critical Infrastructure / Key Resources

TTX Vault Package Seventeen is designed to save you more time than you could possibly calculate. Tabletops assist in the evaluation of plans and to get single and multiple agencies to work together. They are also designed to be scalable and pertinent. All of the HSEEP required paperwork for a tabletop exercise is pre-assembled and able to be edited.

**SKU: CIKRTTX6**

**\$500**

TTX Package Seventeen – Critical Infrastructure / Key Resources includes our single scenarios;

- Pipeline
- Transmission Line Failure
- Dam Failure
- Water / Wastewater Plant Failure
- Internet System Failure

## Each Exercise Includes

- Situation Manual
- Briefing slides in PowerPoint
- Exercise Summary
- Participant Feedback Forms
- Exercise Evaluation Guides
- After Action Improvement Plan Template

The scenario disk has over 700 electronic files to support your tabletop including custom forms and the all plans, informational sheets and maps for Chelsea County USA.

This concept and product was designed keeping in mind how valuable emergency managers and public safety professionals time is. TTX Vault scenarios give you a jump start on the tedious process of exercise assembly. Additional files provided include ICS forms and custom built ICS document products.

## Pipeline - CIKRTTX1 \$100

It sure is convenient. A pipeline speeds product from the ground, to process, to customer delivery quickly and economically. Occasionally that process is disrupted, creating an emergency situation, and when that happens it is serious business.

## Transmission Line Failure – CIKRTTX2 \$100

Just like a pipeline, it speeds services quickly and economically. Occasionally that service is disrupted, creating an emergency situation, and when that happens it is serious business.

## Dam Failure – CIKRTTX3 \$100

A Dam failure or even the threat of a Dam presents a multitude of issues and is one of the most challenging issues a community can face.

## Water / Wastewater Plant Failure – CIKRTTX4 \$100

We probably take clean drinking water from the faucet and the ability to flush our toilets for granted. It is only when we cannot do that for a significant period of time that we really notice.

## Internet System Failure – CIKRTTX5 \$100

It is really hard to imagine. No internet. No ability to check an electronic map for directions, no email, and no ability to access funds in the bank or ATM.

## TTX Vault Package Eighteen - Unmanned Aircraft Systems

You have the equipment, you have the need to practice with it, and there is nothing like a good drill. The TTX UAS Package includes five exercises that could happen to any size community at any time, and accountability is paramount. All UAS Drill scenarios comes with an additional template set in our Chelsea County USA online simulation environment and a complete and a **robust master scenario event list of injects takes you through preflight checks, mission planning, mission execution and post mission analysis**. It also counts as an exercise since all of the HSEEP required paperwork for a drill exercise provided and pre-assembled and able to be edited.

**SKU: UASTTX6      \$750**

TTX UAS Package has our single scenarios;

- Documentation Mission / Post Investigation
- Inspection Mission / Critical Infrastructure & Key Resources
- Intel Mission / Law Enforcement
- Search Mission - Abduction
- Search Mission – Patient Walkaway

The scenario disk has over 700 electronic files to support your tabletop including custom forms and the all plans, informational sheets and maps for Chelsea County USA.

This concept and product was designed keeping in mind how valuable emergency managers and public safety professionals time is. TTX Vault scenarios including the drill series gives you a jump start on the tedious process of exercise assembly. Additional files provided include ICS forms and custom built ICS document products and the **NEW ICS 220 for UAS**.

### **Documentation Mission / Post Investigation – UASTTX5 \$150**

Our Documentation Mission / Post Investigation scenario is a great practice session for video chain of custody in an investigative matter and we all know, accountability is paramount.

### **Inspection Mission / Critical Infrastructure & Key Resources – UASTTX4 \$150**

This scenario covers a data gathering mission for inspection of a pipeline or other area where access by ground may not be possible, or safety is an issue.

### **Intel Mission / Law Enforcement – UASTTX3 \$150**

This scenario employs the UAS to observe a SWAT mission for officer safety

### **Search Mission – Abduction – UASTTX1 \$150**

This time, we use the UAS to aid in the search for a person who is attempting to elude law enforcement.

### **Search Mission – Patient Walkaway– UASTTX2 \$150**

This scenario covers the use of a UAS to search for a person who is not necessarily avoiding authorities, but has wandered away from a care facility.

#### **Each Exercise Includes**

- Exercise Plan
- Master Scenario Event List
- ICS 213 for Exercise Facilitation
- PowerPoint Briefing Slides
- Exercise Summary
- Participant Feedback Forms
- Exercise Evaluation Guides
- After Action Improvement Plan Template

## Chelsea County USA

*Owned and Operated by The Blue Cell, LLC*

Our fully functional web simulation environment offers an enormous variety of possibilities with three differently sized communities in the County; multiple locations include fire, law enforcement, EMS, hospitals, schools, public works, airport, public health, and county fairgrounds.

### The site features

- Extensive mapping from Orion
- Fully functioning emails for key county personnel
- A working dispatch phone system

Fully integrated plans include \* Emergency Operations Plan \* Evacuation Plan \* Mass Fatality Plan  
\*Continuity of Operations Plan \* Hazmat Plan \* Agriculture Plan \* County Budget

Chelsea County USA (CCUSA) raises the bar on notional, command, decision-making training. With hundreds of typed resources and character names, exercise possibilities are endless. The site has multiple pages of Notional material and information. CCUSA can be combined with Intelligent Accountability Alliance solutions (Salamander, Dragonfly, and Orion) and can even be explored three dimensionally with Command School TTX for tactical game play.
