

INTRODUCING THE SELF MONITORING FIRE SUPPRESSION SYSTEM!

Fire TKO CONSTANT COVERAGE

FireTKO now offers a standalone, self-monitoring fire suppression system that utilizes our effective FST (Fire Suppression Tool). When the Team-1DA monitor pairs with our FST, the system provides 24/7 monitoring, allowing you to continuously protect your business and property—even if you are not there. When the monitor recognizes a Rate of Rise in temperature, which is an increase of 40°F, or any temperature higher than 170°F, the Fire TKO FST will deploy automatically. This makes the CONSTANT COVERAGE ideal for vacation homes, garages, data storage center, recreational or commercial boats, or anywhere that you want to protect property.

The FireTKO **CONSTANT COVERAGE** includes:

- FireTKO FST, no handle
- Team-1DA monitor
- Wall Mounting Bracket
- 15 ft. Wire Harness

MAP \$1,599.99

Additional items to add to above:

- 5 ft. Wire Harness
- FireTKO FST, no handle

MAP \$ 10.00

MAP \$ 899.99
